Art Unit: 1722

1. The following is an examiner's statement of reasons for allowance: The prior art of record does not teach or fairly suggest a closing unit without bars for an injection molding machine having at least one closing drive comprising two counter-moving displaceable components, supporting rails mounted on a machine base, a stationary mold clamping plate rigidly connected to the supporting rails, a displaceable mold clamping plate slidably supported on the supporting rails, wherein the stationary clamping plate is connected to one of the two components of the closing drive by means of a pivot bearing, the displaceable clamping plate is connected to the other of the two components of the closing drive by means of at least one pivot bearing such that the closing drive is secured only in said pivot bearings and such that the closing forces of the closing drive only act upon the clamping plates via said pivot bearings, whereby no bending moments are transmitted to the supporting rails or machine base, as claimed in claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to James Mackey whose telephone number is 703-308-1195. The examiner can normally be reached on M-F, 8:30-5:00.
